

## The Butterfly Effect Part 6

*Deep down below and high up in the sky, they travelled far and wide but never ever made a cry. The wind would be their carrier and help them on their way, some flew into the darkest night and some only in the day.*

**rnd 40 (G) - start in any corner**

*in this rnd you will be going up and down jumping between several different rnds. From the top you will be making chains letting you "climb" down as far as to rnd 33. Starting from the top of rnd 39 (dc-couples) you will attach in the unworked sts from rnd 38 (there are 19x2 of these places on each side), then down to rnd 36 and finally in rnd 33. After this you will make the same climb but going up. This will be done diagonally so therefore you will skip a lot of sts, so take care to look at the pictures and following instructions well.*
